

U-Space regulatory framework and the related standards

Andres Van Swalm

Co-Founder & CPO Unifly

- The work is based on
 - The implementing regulation
 - The draft U-space regulation (Commission and EASA)
- U-space is key for enabling the drone industry
- Open Market
- CIS (Common Information Services) and USSP (U-space Service Providers)
- U-space services provided by multiple USSPs

CIS

- Designated by Member State for every U-space
- Single trustworthy source of information
- Support the exchange of information and coordination between U-space Service Providers and ATC

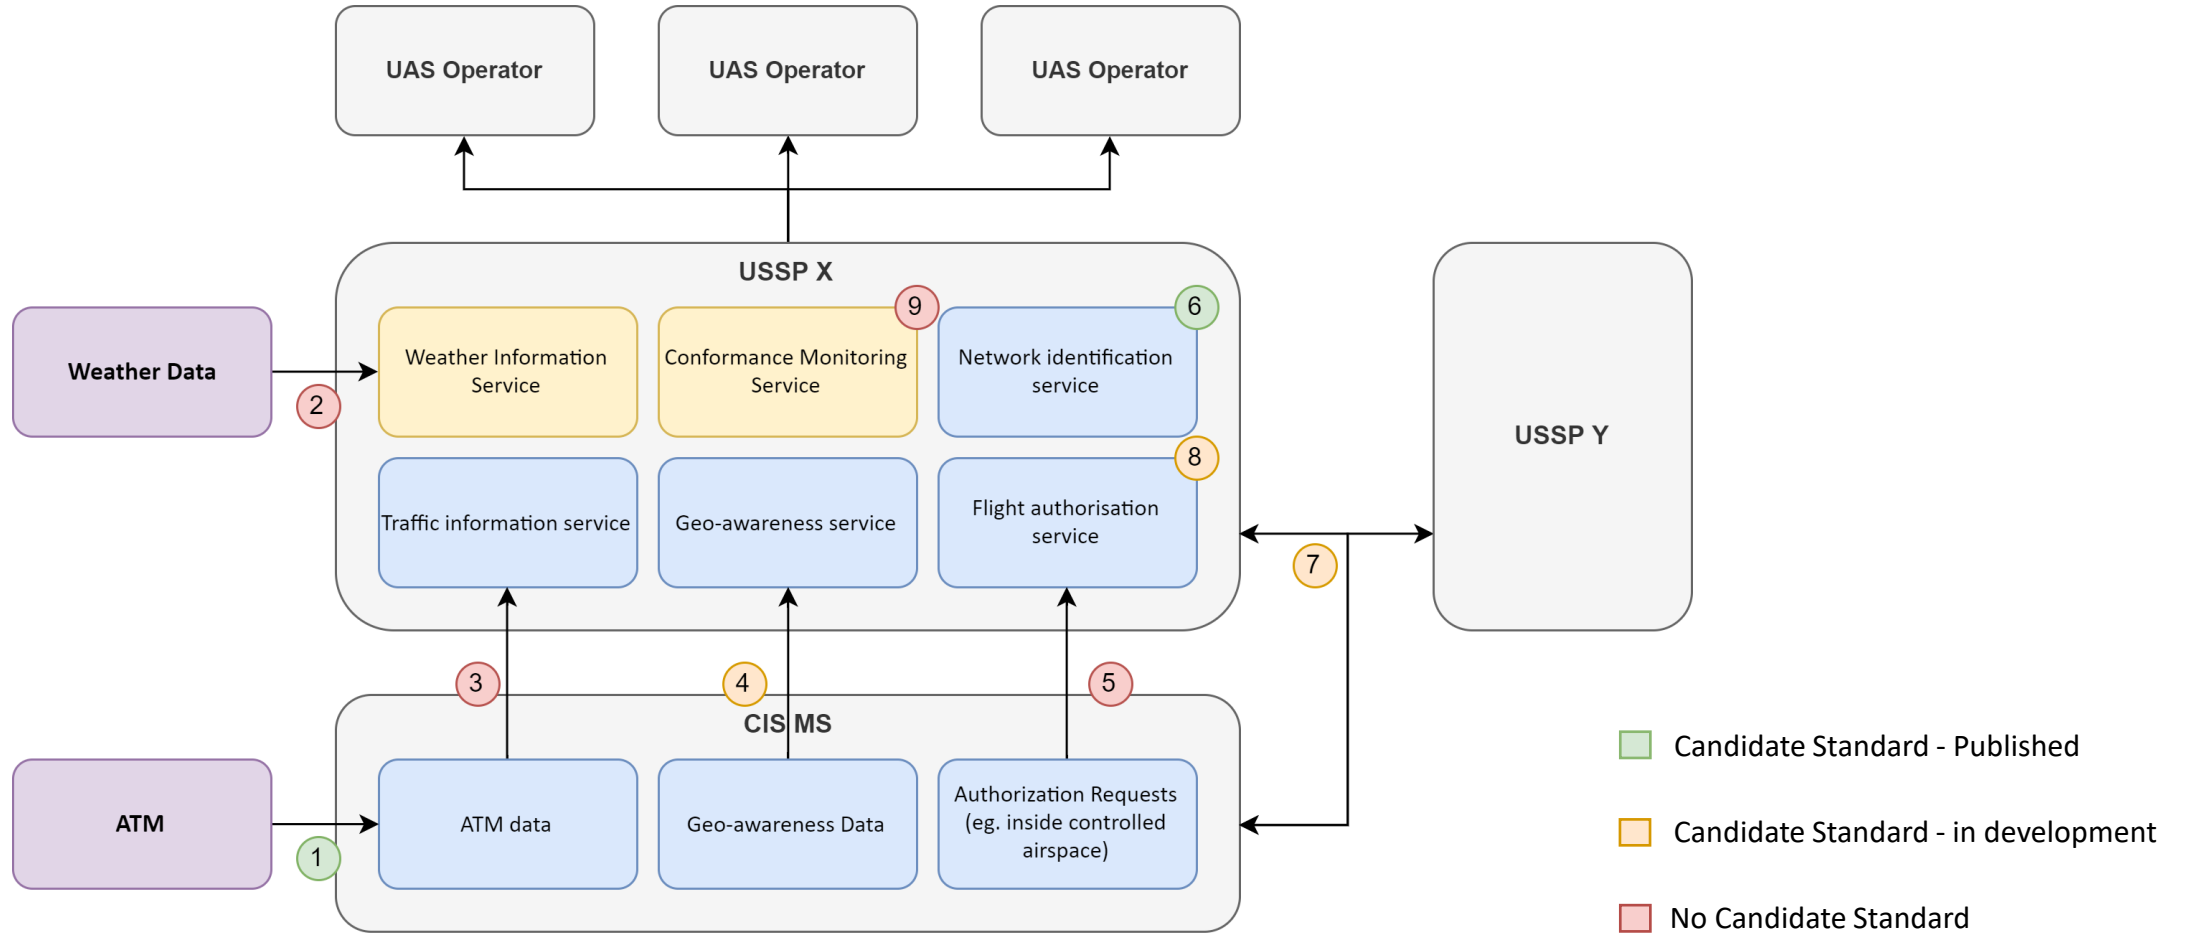

USSP

- Provides services to Drone Operators
- Provide a minimum set of U-space services to drone operators

- Network identification service
- Geo-awareness service
- UAS flight authorisation service
- Traffic information service
- Weather information service Optional Service
- Conformance monitoring service Optional Service

Standardisation bodies defining UTM standards:

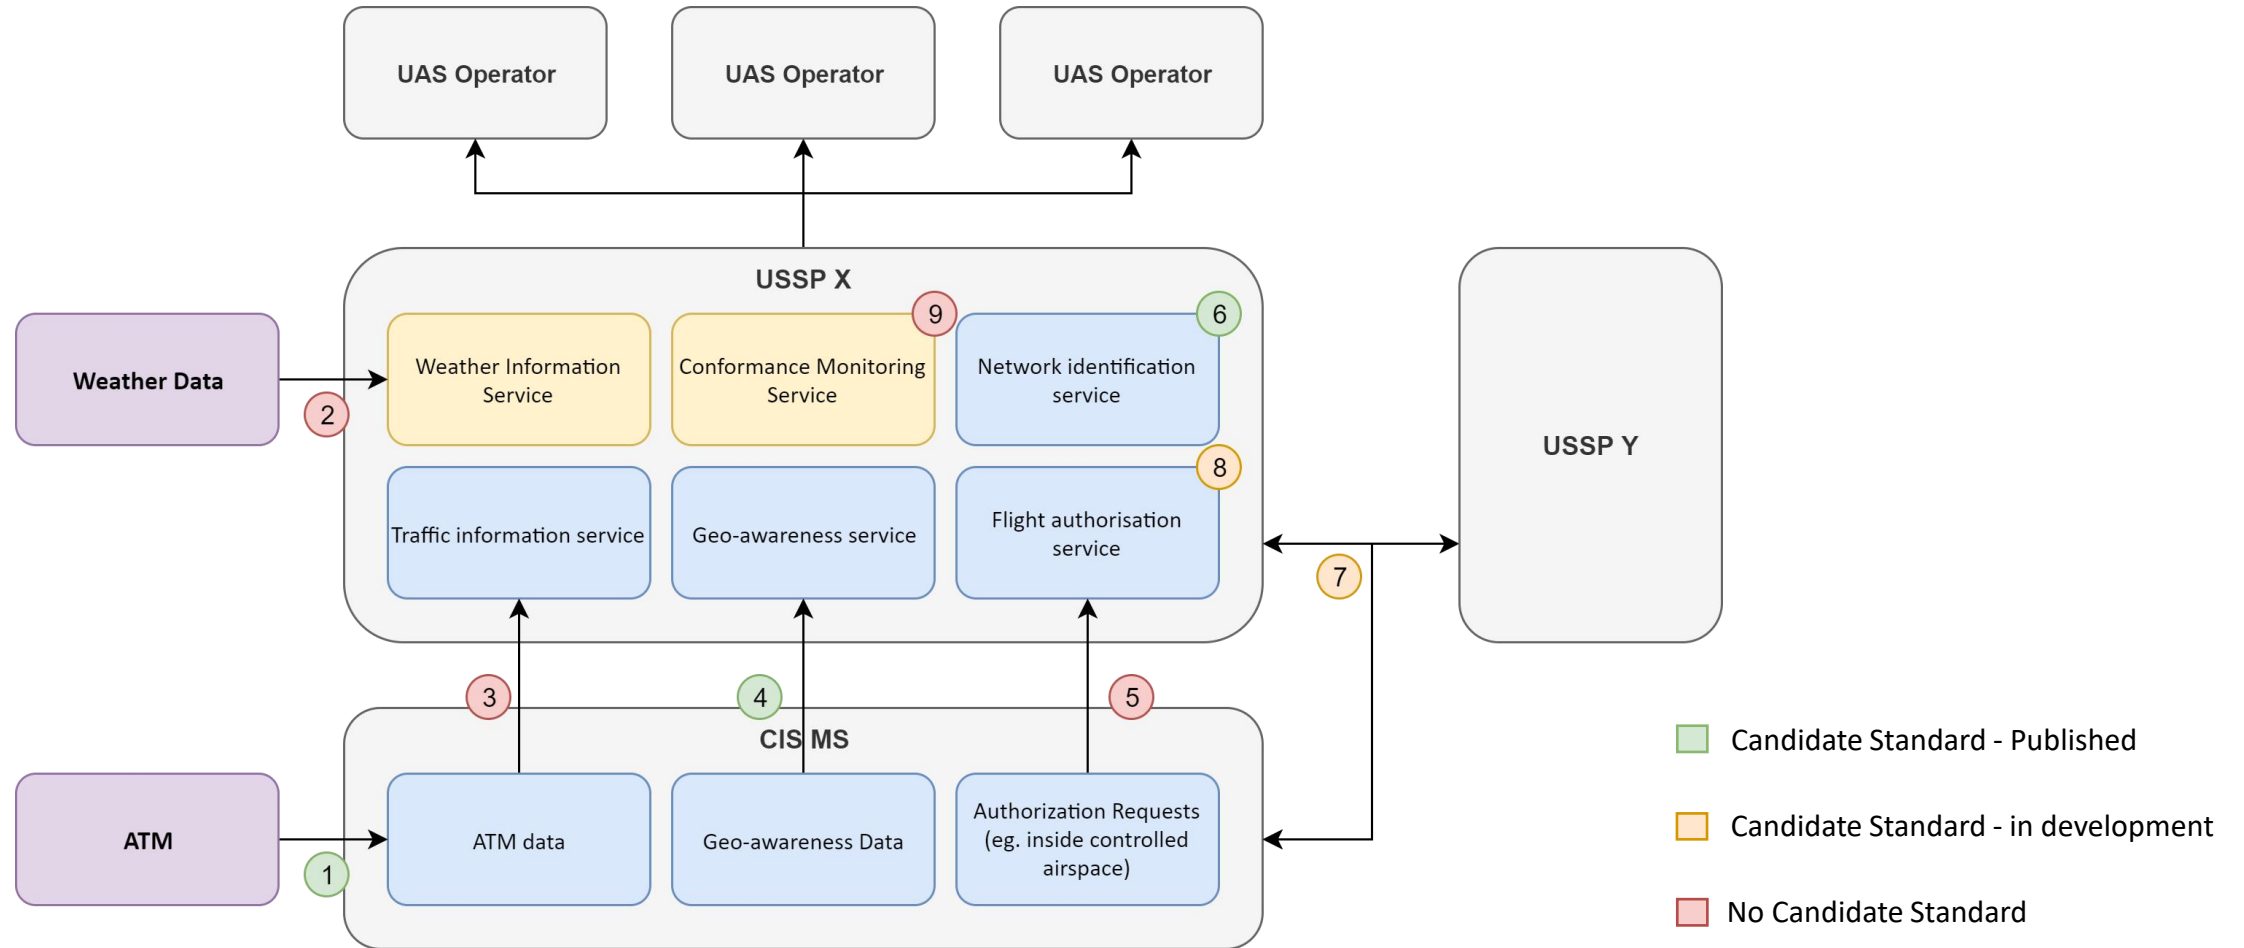

- Eurocae (3)
- ASTM (4)
- ISO (5)
- IEEE (1)

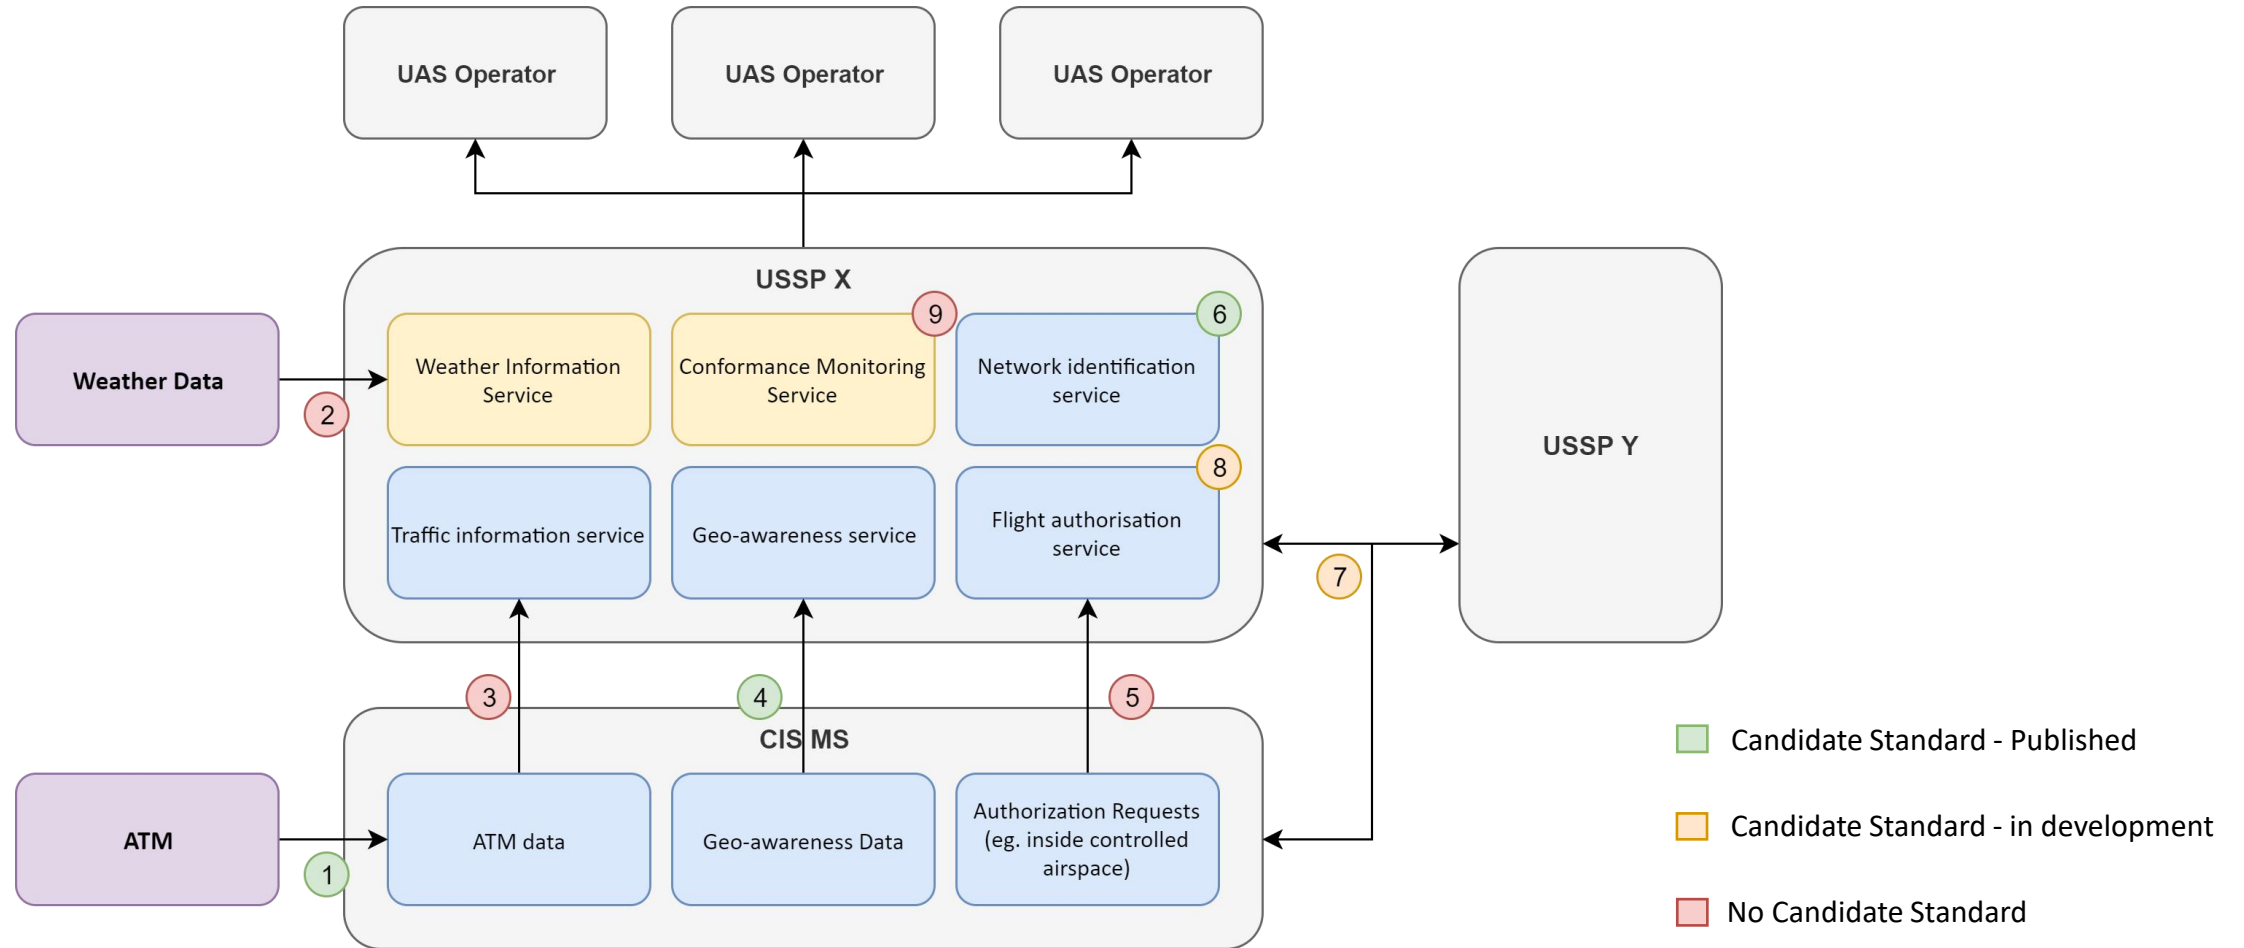

- ATM – U-space : Existing manned Aviation Standards (1)
 - Asterix Protocols
- Weather data (2)
 - WK73142 - F38.02: New Specification for Weather Supplemental Data Service Provider (SDSP)
Performance
Status: Under Development
- CIS – USSP : Air Traffic Data (3)
 - No candidate standards

U-space services – Candidate Standards

- Geo-Awareness Service (4)
 - WG-105 SG-33: UTM Geo-Fencing (ED-269)
Status: Published
 - ISO/CD 23629-7: UAS traffic management (UTM) — Part 7: Data model for spatial data
Status: Under Development
 - ASTM - WK63418 - New Specification for Service provided under UAS Traffic Management (UTM)
Status: Under Development
- Dynamic Airspace Configuration - Flight Authorization Requests (5)
 - No candidate standards

U-space services – Candidate Standards

- Network identification service (6)
 - ASTM - WK65041 - UAS Remote ID and Tracking (F3411 – 19)
Status: Published 
 - ED-282 – SG-32: Minimum Operational Performance Standard for UAS E-Identification
Status: Approval
 - ISO/PWI 23629-8: UAS Traffic Management (UTM) — Part 8: Remote identification
Status: Under development
- Communication Service (7)
 - ASTM - WK63418 - New Specification for Service provided under UAS Traffic Management (UTM)
Status: Under Development 

U-space services – Candidate Standards

- Flight Authorization Service (8)
 - ASTM - WK63418 - New Specification for Service provided under UAS Traffic Management (UTM)
Status: Under Development
- Conformance Monitoring (9)
 - No candidate standards
- Requirements for U-space Service Providers
 - *ISO/WD 23629-12: UAS traffic management (UTM) — Part 12: Requirements for UTM services and service providers*
Status: Under Development

AW DRONES

Thank you! Questions?
